

## IPCC Working Group III Co-Chair Jim Skea

Well, the key message is that we can keep global warming below 1.5 degrees C - it's possible within the laws of physics and chemistry, but it will require huge transitions in all sorts of systems - energy, land, transportation.

But what the report has done is to send out a clear message to the governments that it is physically possible - it's now up to them to decide whether they want to take up the challenge.
